

# Assessment GUIDE assessment 3

## PowerPoint Presentation

This assignment requires you to demonstrate an advanced nursing response to symptom management in clinical practice as a framework for teaching and learning in the clinical environment. This presentation can be used as an educational opportunity for you to present to your colleagues.

For this assessment please use your selected patient from the Assessment 2 Case study. You must use the same case as assignment 2 but if you have reason to not use the same patient please email to explain the reasons for you needing to change the case study from that previously used.

This assessment task will enable you to reflect on your day-to-day practice within your advanced nursing/ clinical practice and or integrated healthcare team, clinical leadership activities and your role in peer education.

This assessment task aims to develop your ability to evaluate, interpret and apply high quality evidence in your practice by critically analysing and presenting best practice interventions to optimise care that demonstrates advanced nursing/clinical response to symptom management in clinical practice.

This assessment task will enable you to reflect on your practice within your advanced nursing/midwifery/healthcare practice and/or integrated healthcare team, clinical leadership activities and your role in peer education. Your presentation needs to be concise and have an evidence base (peer-reviewed journals published within last 5 years). INCLUDE speaker's notes but NOT a narration. with a word count of 1000 ( +/- 10%) to explain your presentation for later use in your clinical practice and for the marker to understand what you would be saying as a voice-over (No voice over required in this assessment).. The speaker's notes are only included in the word count, not the words on the slides.

You must use a maximum of 12 slides (excluding references).

Your presentation needs to be concise and have an evidence base (peer-reviewed journals published within last 5 years). Please use dot points on your slides and make the visually interesting for the audience as your presentation may be used for later in your clinical practice

Your assignment should address the following points:

1. Introduce your patient and the clinical presentation and the related symptom/clusters of symptoms identified
2. What is the aetiology/origin of the symptom(s)?
3. Describe and discuss the diagnostic tools and nursing/midwifery/healthcare assessments that were conducted to assess your patient's symptom(s)?
4. What nursing/midwifery/healthcare interventions were missed or sub-optimal?
5. What could be the key preventative and/or management strategies to prevent reoccurrence within your setting for future patient with similar symptomatology?
6. What is the next step that you, as an advanced practice clinician, will undertake to improve the symptom(s) management for this patient (and/or family carers) moving forward?
